DEVI PRIYA POOJITHA   **poojitha0412@gmail.com**
UX/UI Developer   **Phone: 669-235-7797**

SUMMARY

- Web UI Developer with 6+ years of experience in Application Software Design, Object Oriented Design, Development, Analysis, Documentation, Debugging, Testing and Implementation.
- **Expertise in html, css, angular js,** node js, **react js and bootstrap.**
- Experience in developing and designing user experiences of Internet/Intranet applications using **HTML4.0/5, CSS2/3, XTHML, XML, JAVASCRIPT, AngularJS, ReactJS, JQUERY, JSON, JSTL and AJAX meeting W3C standards**.
- Experience on working with **CSS Background, CSS Layouts, CSS positioning, CSS text, CSS border, CSS margin, CSS padding, CSS table, classes, Pseudo elements and CSS behaviors in CSS.**
- Creating custom**, general use modules and components which extend the elements and modules of core AngularJS.**
- Expert in develop web pages for different devices like Mobile, Tablet and Desktop using **RWD and Twitter Bootstrap**.
- Extensively worked on cross browser compatibility and Responsive **Web Design on different browsers like Safari, Firefox, Google Chrome and Internet Explorer.**
- Experience using all popular text-Editors like **Eclipse, Sublime Text, and Notepad++.**
- Expert in **building Templates, Lockups and Prototypes, Layouts and Flow of future** pages.
- Skilled at analyzing and **solving browser compatibility challenges and possesses capability to sustain consistency and well commented HTML and CSS markup.**
- Expertise in developing Html pages based on DIV layout and Cross browser platform.
- Extensive experience in **SQL, PL/SQL programming, stored procedures, triggers and Query optimization, also written queries for insert, update and modification operations**. Performed database normalization and optimization using database tools.
- Have expertise in using various **SDLC models like Waterfall, Agile** Scrum process with Sprint Planning.
- Excellent interpersonal abilities, communication skills, time management and Team skills and strive hard to attain project goals inside assigned deadlines.
- Experience in using version controls such as GIT and SVN.
- Experience in preparing **Software Test Plan**, **Test cases** and **Test data**.
- Possess good team-management, leadership qualities and Good Team performer.

TECHNICAL SKILLS

UI Design Tools	HTML,CSS**, angular js , Java script**, **React js, Bootstrap**
Databases	**Oracle 10g/11i, My Sql**
Languages	C, **SQL,** Unix, **java script,**

Packages	SQL*PLUS, **Toad**, SQL * Loader, IMPORT/EXPORT, SQL developer
Web tools	Macromedia Dream weaver, Flash MX, MS visual studio
Operating Systems	Windows 95/98/NT/00/XP/vista/7, **Red Hat Linux, ubuntu**

PROFESSIONAL EXPERIENCE

Symantec,CA   **Apr 16 - Present**
UI/UX Designer

Description:
Symantec Corporation is an American software company headquartered in Mountain View, CA. The company produces software for security, storage, backup and availability - and offers professional services to support its software.

The UX/UI design project was to create an internal website facilitating access control mechanism for finance data. the UI was designed for Senior finance owners as a way to request/grant access to finance analysts

The project is to build a UI interface for row-level security framework for finance data. Finance data involves data related to company's expenses and revenue and is maintained with high confidentiality. only certain people are allowed to view/report on the data. The project involves creating UI's for finance analysts to request access for certain users to view the data. Shared profiles or custom profiles could be created depending upon the need. The security will be flowing to the reports as well as the custom databases where the data is stored.

Responsibilities:
- Involved in developing the UI pages using HTML, DHTML, CSS, JavaScript, JSON, JQuery, Ajax,angular js, react js, Bootstrap.
- Used JQuery core library functions for the logical implementation part at client side for all the application.
- Implemented graphical animations in web pages using Bootstrap, AngularJS, NodeJS and CSS3.
- Designed business applications using web technologies like HTML, XHTML, and CSS based on the W3C standards.
- Involved in developing HTML and JavaScript for client side presentation and, data validation on the client side with in the forms.
- Developed Page layouts, Navigation and presented designs and concepts to the clients and the management to review.
- Involved in writing application level code to interact with APIs, Web Services using AJAX, JSON and XML.
- Responsible for checking cross browser compatibility and hence worked on different browsers like safari, Internet explorer, Firefox and Google chrome.

- Involved in writing and modifying Procedure, Queries, Views and Triggers and calling them from JavaScript using the Tempnet Framework.
- Have expertise in using various **SDLC models like Waterfall, Agile** Scrum process with Sprint Planning.
- Involved in writing SQL Queries, Stored Procedures.
- Experience in using version controls such as GIT and SVN.
- Experience in preparing **Software Test Plan**, **Test cases** and **Test data**.

Environment: HTML 4.x, CSS2.x, JavaScript, JQUERY, Angular JS, React JS, AJAX, JSON, XML, Eclipse, Sub Version.

IBM, NC   **Aug 13 - Mar 16**
Front End Developer

Description:
IBM (International Business Machines Corporation) is an American multinational technology company headquartered in New York, United States, with operations in over 170 countries. IBM manufactures and markets computer hardware, middleware and consulting services in areas ranging from mainframe computers to nanotechnology

The project was to create a companywide UI for a scheduler. Scheduler was designed to run ETL jobs as well as any custom jobs (python or Java). Any team can create a project and create jobs within the project. Options are provided for scheduling and creating Dependencies between jobs. Also Job runs, failure emails, Job Performance charts and job Stats are provided.

Responsibilities:
- Developed dynamic web pages using HTML/HTML5, CSS/CSS3, jQuery, Angular.js, Bootstrap, CSS3.
- Working closely with other senior developers, product managers, system architects, and the QA team to deliver optimal designs and software to meet and exceed expectations following MVC architecture, under the Rational Unified Process (RUP).
